

## Installation Instructions

1. Double click on ***SSHSecureShellClient-3.2.9*** to start installation of SSH
2. After completion of SSH installation, copy the file inside "***SSH hafez***" directory and paste it to the directory where SSH is installed. For example, on a windows XP machine, it should be this directory: C:\Program Files\SSH Communications Security\SSH Secure Shell
3. Copy the file inside "***Desktop hafez***" directory and paste it to your desktop
4. Double click on ***Xming-6-9-0-31-setup*** to start installation of Xming
5. After installation of Xming, double click on ***Xming-fonts-7-3-0-22-setup*** to start installation of Xming fonts. If it says Xming already exist, let it overwrite existing installation.
6. You are done. For tutorial on how to use SSH and Xming to login to the server see:
